

Introducing the New...

Versa Lift™

Attic Storage Lifting System

Versa Lift is the answer to all of your home storage problems. Now you can keep your garage space neat by sending storage boxes up to the attic and out of sight!

Why make payments on a mini-storage?

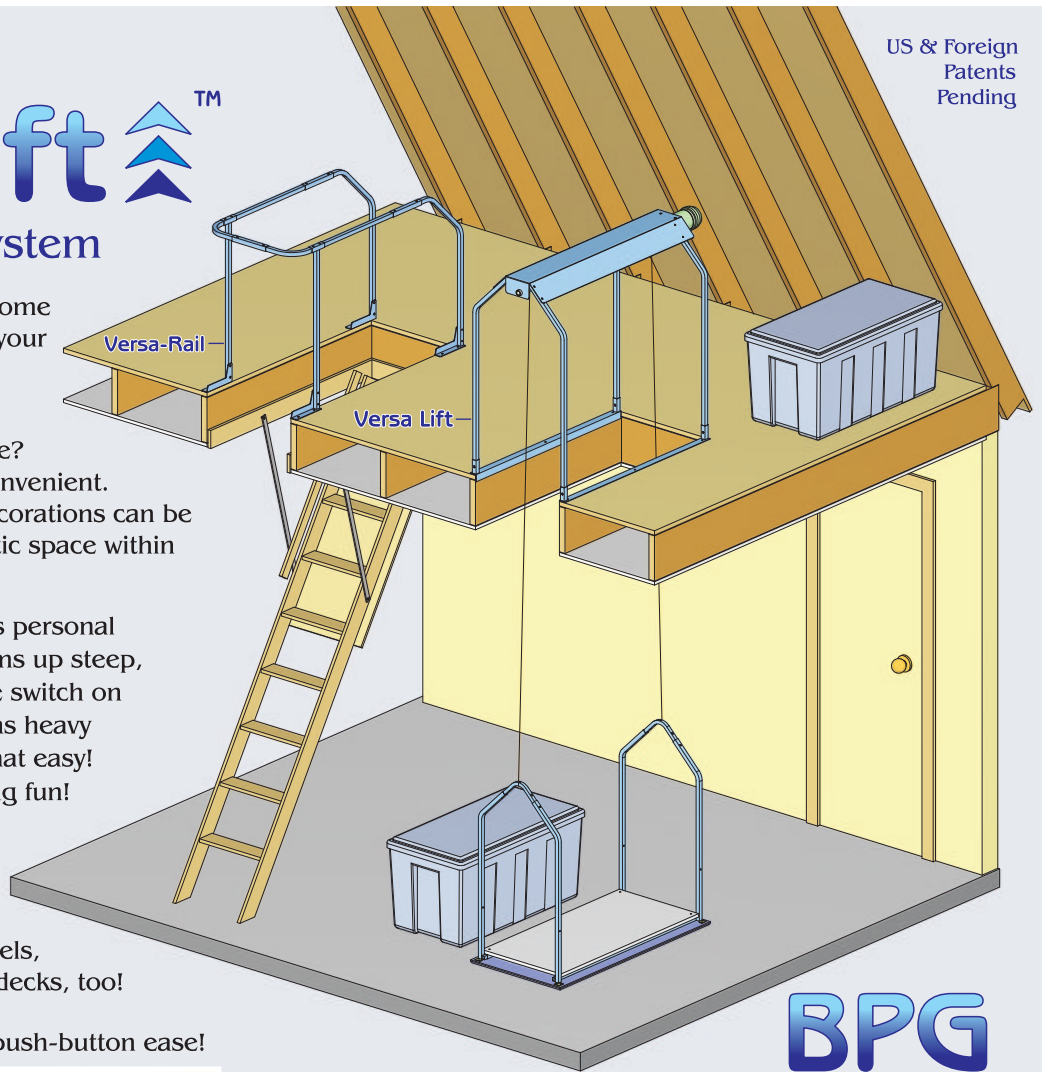

Versa Lift costs less and is far more convenient. Your seasonal clothing and holiday decorations can be conveniently stored in your unused attic space within easy reach, anytime, day or night!

Versa Lift eliminates the risk of serious personal injury inherent in carrying storage items up steep, shaky ladders. Instead, just press the switch on the hand-held remote to move loads as heavy as 200 lbs. to or from the attic... It's that easy!

Versa Lift makes organizing and storing fun!

The **Versa Lift** installs into a framed opening in the ceiling, just like the opening for a folding attic ladder. The **Versa Lift** is also great for split-levels, stilt-homes, basements, and covered decks, too!

Store or retrieve up to 200 lbs. with push-button ease!

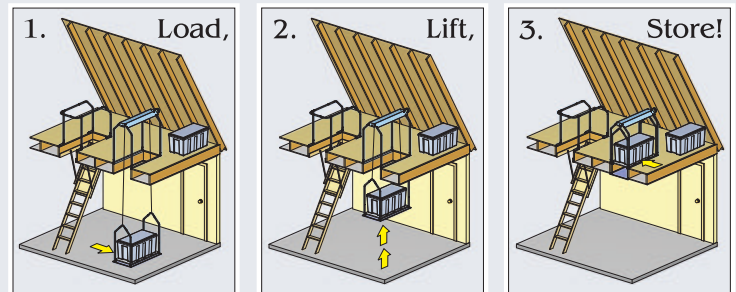

BPG
Byers Products Group

Versa Lift is the easy way to organize your home and garage. Get easy access to your valuable attic space without heavy lifting. Why risk injury trying to shove storage boxes up the attic ladder? **Versa Lift** is the easy way to store everything:

*Storage Containers & Boxes ♦ Holiday Decorations ♦ Yard Art
Christmas Lights ♦ Ornaments ♦ Hobby and Craft Supplies
Sports Equipment ♦ Tax Records ♦ Books ♦ Camping Gear
Keepsakes ♦ Off-season Clothing ♦ And Much More!!*

Also New from BPG...

Versa-Rail™ Attic Ladder Safety Railing

When you need to visit your attic to store or to retrieve items, the unguarded ladder opening poses a serious hazard to you and your loved ones! It only takes a few minutes to install the new **Versa-Rail** around your ladder opening, making your attic storage area safer for both

you and your family members. In addition to guarding the opening, **Versa-Rail** provides a convenient hand rail that will add safety and security when you step off or onto the attic ladder. **Versa-Rail** is quick & easy to install with ordinary tools, a perfect job for the do-it-yourself handyman!

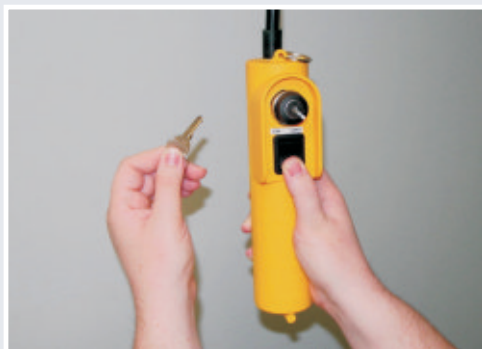

Versa Lift™

Attic Storage Lifting System

You can get completely organized and let Versa Lift take care of all the heavy lifting!

Versa Lift is the only lifting system that closes the ceiling port while raising the platform flush with the upper floor, so you can just slide cargo on or off the platform.

The Versa Lift system will turn your attic space into your own private mini-storage!

Versa Lift features a locking main power switch with a removable key to provide added security and child safety.

Versa-Rail™

Attic Ladder Safety Railing

Problem: Entering or exiting the attic from an attic ladder is very dangerous without a hand-rail. The ladder opening is a falling hazard when working in the attic!

Easy Solution: The Versa Rail dual grab rails provide comfort and security when you are stepping onto or off of the ladder and safely surrounds the ladder opening!
